Synthetic Test Report — Restaurant AI Visibility Report

Synthetic Test Cafe · 2026-10-16T13:50:09.379Z · Version 2 · partial

1. Restaurant and Location

Synthetic Test Cafe
1 Example Street, Boston, MA
https://restaurant.example.com/
Cuisine: Not supplied
Identity provenance: requester_asserted

2. Executive Summary

19 of 20 planned answers are complete; 19 have a judgment, 1 failed or incomplete, and 0 remain missing. This is an API visibility snapshot for one location.

3. Website Technical Readiness

Technical score: 72/100. Page fetch: succeeded. Business extraction: succeeded. Technical audit: succeeded.

4. AI Visibility by Model

Model target / question group	Coverage	Mentioned	Any-source / submitted-domain citations
openai / Discovery	8/8 valid; 8 judged; 0 failed; 0 missing	100% (8/8; 0 unknown)	0% (0/8; 0 unknown) Submitted domain: 0% (0/8; 0 unknown)
openai / Brand verification	1/2 valid; 1 judged; 1 failed; 0 missing	100% (1/1; 1 unknown)	0% (0/1; 1 unknown) Submitted domain: 0% (0/1; 1 unknown)

Model target / question group	Coverage	Mentioned	Any-source / submitted-domain citations
gemini / Discovery	8/8 valid; 8 judged; 0 failed; 0 missing	100% (8/8; 0 unknown)	0% (0/8; 0 unknown) Submitted domain: 0% (0/8; 0 unknown)
gemini / Brand verification	2/2 valid; 2 judged; 0 failed; 0 missing	100% (2/2; 0 unknown)	0% (0/2; 0 unknown) Submitted domain: 0% (0/2; 0 unknown)

openai: gpt-5.4-mini-2026-03-17; search enabled, execution recorded per answer
gemini: google/gemini-2.5-flash + exa (up to 3 results)

5. Recommendations and Location Match

Model target / question group	Coverage	Recommended	Correct-location recommendation
openai / Discovery	8/8 valid; 8 judged; 0 failed; 0 missing	88% (7/8; 0 unknown)	88% (7/8; 0 unknown)
openai / Brand verification	1/2 valid; 1 judged; 1 failed; 0 missing	100% (1/1; 1 unknown)	100% (1/1; 1 unknown)
gemini / Discovery	8/8 valid; 8 judged; 0 failed; 0 missing	100% (8/8; 0 unknown)	100% (8/8; 0 unknown)
gemini / Brand verification	2/2 valid; 2 judged; 0 failed; 0 missing	100% (2/2; 0 unknown)	100% (2/2; 0 unknown)

Recommendation and branch identity are separate judgments. Brand verification is factual checking, not a discovery recommendation-rate benchmark.

6. Competitor Mentions

Synthetic Test Cafe: 16 observed mentions out of 32 observed brand-answer pairs; sample share of voice 50%.

- Harbor Cafe: 16 mentions; 50% sample share of voice (evidence: area:openai, area:gemini, cuisine:openai, cuisine:gemini, lunch:openai, lunch:gemini, dinner:openai, dinner:gemini, family:openai, family:gemini, friends:openai, friends:gemini, date:openai, date:gemini, budget:openai, budget:gemini)

7. Priority Actions

No evidence-backed priority action was generated from the available checks.

8. Evidence and Methodology

Frozen plan SHA-256: f042746b06e432a418fc4274ec90aac51d8946c3407e376c4d781b3f955abfd2. Report SHA-256: d57ad62d1aa79ae74379d98f239bdf7141880a885001d585c26114d866a06d47. Ten English questions, two API targets, one sample per question and target. Eight discovery questions and two brand-verification questions.

1. area (discovery): Which restaurants would you recommend in Boston, MA? Give a short reason for each recommendation.
2. cuisine (discovery): Which local restaurants would you recommend in Boston, MA? Give a short reason for each recommendation.
3. lunch (discovery): Where would you recommend going for lunch in Boston, MA?
4. dinner (discovery): Which restaurants would you recommend for dinner in Boston, MA?
5. family (discovery): Which restaurants would you recommend for a family meal in Boston, MA?
6. friends (discovery): Which restaurants would you recommend for a meal with friends in Boston, MA?
7. date (discovery): Which restaurants would you recommend for a date in Boston, MA?
8. budget (discovery): Which restaurants would you recommend for a budget-friendly meal in Boston, MA?
9. identity (brand_verification): What are the street address and phone number of Synthetic Test Cafe in Boston, MA? If you cannot verify a detail, say so.
10. actions (brand_verification): Where can I find the official menu and reservation options for Synthetic Test Cafe in Boston, MA? If an option cannot be verified, say so.

9. Missing Data and Limitations

- SYNTHETIC TEST REPORT: Some answers were generated by the stub provider. This is not a real restaurant visibility measurement and must not be presented as live evidence.
- This report is one English-language API sample per question and model; it does not measure consumer ChatGPT or Gemini website results, repeatability, or search demand.
- Discovery and brand-verification results are separate. Each metric shows its own known-answer denominator; missing and unknown answers are never treated as a negative outcome.
- Email verification establishes mailbox access, not ownership of the restaurant website. The location identity was asserted by the requester.
- Correct-location recommendation uses known negative recommendations and recommendations with known branch identity as its denominator. Brand-only recommendations have unknown branch identity.
- Competitor share of voice counts each observed brand at most once per discovery answer, within this fixed sample only; it is not market share.

- Permission to search is distinct from observed search execution. Citation availability depends on the provider interface.
- Any-source citation coverage and submitted-website domain citation coverage are separate. A domain match includes its subdomains and does not establish website ownership, citation accuracy, or the correct restaurant branch.
- Website technical readiness is a separate diagnostic. No causal relationship between a technical finding and AI recommendations has been established.
- This report has missing or incomplete stages. Review the coverage and individual sample statuses before interpreting rates.

Website fetch issue: None recorded. Extraction issue: None recorded. Technical audit issue: None recorded.
